

Hub4AIM is a unique alliance of 4 entities JBT HubUp (Groupe JBT, Progress Silicone, Opia technologies, Sibaya BCPPharMed, R&D Project Managing, ICM France and Eveon), CEA Leti, Université Grenoble Alpes and CHUGA Grenoble Teaching Hospital which are coupling their skills to mature technology, regulatory, clinical and industrialization.

ACCELERATE YOUR INNOVATION IN MEDTECH

Micro-nano-bio technologies maturation

Leti, a technology research institute at CEA Tech, pioneers micro and nanotechnologies, and smart systems for health monitoring, diagnosis and treatment.

Software development

The UGA-LSI partner has developed the CamiTK environment dedicated to software-based medical device prototyping.

Usability study, clinical validation, medical service evaluation

The Grenoble Alpes University Hospital Center (CHU-GA) is the 12th most important hospital in France. It has advanced technical facilities and provides highly specialized health care.

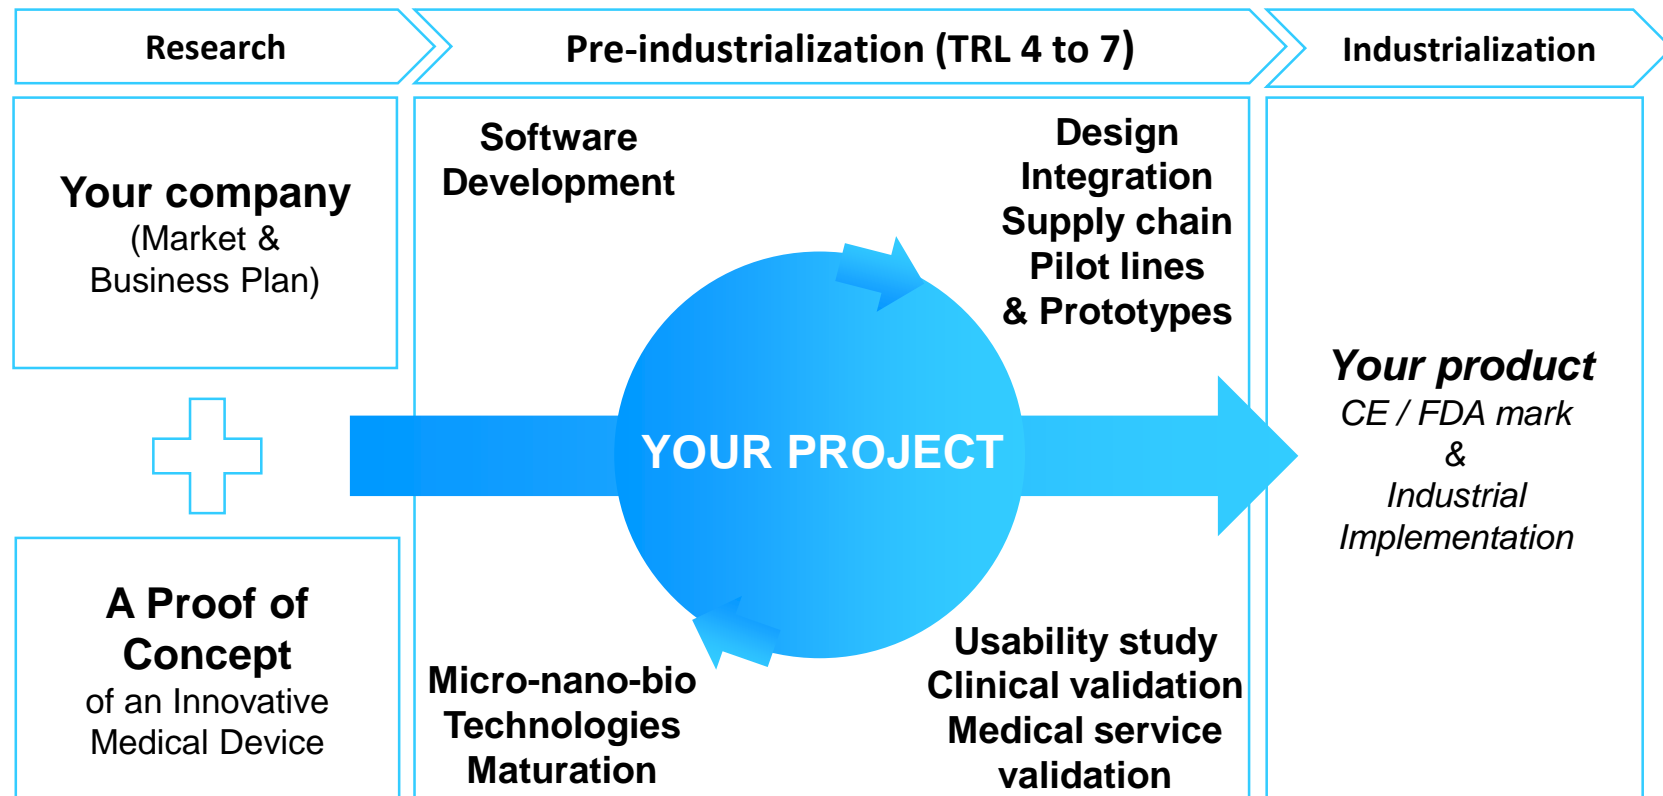

Design, integration, supply chain, pilot lines & prototypes

JBT HubUP is a company and an entrepreneurial alliance which offers the pharmaceutical and medical industry a unique solution for developing innovative medical devices by gathering all necessary professional skills.

From proof of concept with associated business plan... ... to CE mark & industrialization

- A unique proposal including **technology** innovation, **manufacturing** companies and **clinical** studies expertise
- A dedicated **project team** to answer to your specific needs
- A complementary and **flexible** offer, adapted to your PoC
- A streamlined process to mitigate **risks** and optimize **costs**
- An access to network's **expertise** and **facilities**
